Voorbereiding

VAN BOERBOKKE VIR SKOU

■ LUKAS BURGER

Skou is volgens baie mense 'n geval van wie kan die beste voer of wie het die beste hanteerder. As dit maar die geval was sou skou 'n "piece of cake" gewees het. Ongelukkig is daar baie meer harde werk, toewyding en hare op jou tande nodig.

Kom ons begin by die begin:

- 1 U moet weet wanneer die skou of skoue is waarvoor u wil voorberei. Dit bepaal wanneer die bokke begin voer word.
 - a Dit hang af van die kondisie van die bokke en of hulle voerkraal toestande gewoon is al dan nie. Bokke wat reeds voorheen geskou het kan 'n mens binne 3 maande afrond. Andersins neem dit langer self s tot 6 maande.
 - b Ooie 4 tand en ouer moet sigbaar dragtig wees of lammers soog tydens 'n skou. Dit kom daarop neer dat u die groep ooie moet paar 3 - 4 maande voor die skou. Waarskuwing: te swaar dragtige ooie vervoer moeilik en raak gou skou sku. (suur)
 - c Voer van ramme vir 'n skou moet lief in groepe van 5 - 7 ramme gedoen word. As groepe groter word groei hulle nie na wense nie a.g.v. seksuele aktiwiteite. Groter ramme moet ook waar moontlik weg van ooie gevoer word. Onthou ramme kan in 'n dekseisoen maklik 10-15kg verloor net deur bronstige ooie te ruik.
 - d Ooie kan groter groepe gemaak word. Goeie praktyk is om hulle in ouderdom groepe op te deel.
- 2 Sny van hoewe of kloue ± elke 3 weke afhangende van hoe nat of hoe droog u toestande is. Terrein waar diere loop speel ook 'n rol. Op harde terrein sal hulle kloue minder gereeld gesny word.
- 3 Trim van bokke: Dit word gedoen 2-3 dae voor die skou.

Wat word weggetrim?

- a Hare wat 'n knop voor die kop vorm.
- b Hare op die nek. (maanhaar)
- c Hare by die voorbene, kroontjie onder by die pens en hare by agter bene. (Hierdie plekke word baie effens getrim.)

Preparation

OF GOATS FOR SHOWS

■ LUKAS BURGER

Shows, as most people would have it, are considered to be about who can feed their goats best or who has the best handler. This is far from the truth, though those elements play some part. If this were only the case, shows would have been a piece of cake all these years! The reality of the matter is that shows require much more hard work, dedication and patience.

Let's start at the beginning and unpack this further.

1. You need to know when the show or shows are that you want to prepare for.
 - a. This determines when feeding of the goats will begin. It depends on the condition of the goats and whether they are used to feedlot conditions or not. Finishing of goats that have been shown before can be completed within 3 months. Otherwise, it takes longer; even up to 6 months.
 - b. Ewes that are 4-tooth and older must be visibly pregnant or have suckling lambs during a show. This means that you have to mate the group of ewes 3-4 months before the show. Warning: overweight pregnant ewes are difficult to transport and become "show shy."
 - c. Feeding of rams for a show should preferably be done in groups of 5-7 rams. As groups get bigger than 5-7, they do not grow as desired due to sexual activities. Larger rams should also be fed away from ewes where possible. Remember, rams can easily lose 10-15kg in the mating season just by smelling ewes in heat.
 - d. Ewes can be made into larger groups. A good practice is to divide them into age groups.
2. Cutting of hooves or claws must be done ± every 3 weeks depending on how wet or dry environmental conditions are. Terrain where animals walk also plays a role. On hard terrain, their claws will be cut less frequently.
3. Trimming of goats' hair is important. This is done 2-3 days before the show. What is being trimmed away? We want to trim; hair that forms a lump in front of the head; and hair on

- d U kan ook die stert hare trim.
 - e Bokke word ook gekam om al die dons hare te verwyder.
- 4 Trim of skuur van horings.
- a Skerp rif op horings kan weg gerasper of geskuur word.
 - b Horings as geheel kan glad geskuur word.
- 5 Beplanning van skouspan:
- a U het reeds die beste groep bokke geselekteer om te voer vir die skou.
 - b Nou weeg u die bokke en haal die bestes uit in elke gewig- of tand klas, bv. 4T of 6T of soos in die buiteland in elke ouderdomsklas.
- 6 Was van bokke. Die dag voor die skou was u die bokke wat u wil skou. Gebruik gewone skottelgoed seep. Nou is u bokke pragtig wit en skoon en gereed vir die skou.
- Praktiese wenk: Spuit maar elke bok wat u wil skou die aanbevole dosis antibiotika voor u hulle was en vervoer vir die skou. Glo my dit spaar u baie skade en trane. Dit voorkom longontsteking, pasteurella en verminder stres.
- 7 U arriveer by die skou.
- a Glo my, u senuwees is op. Is my bokke goed genoeg, vet genoeg, mooi genoeg en groot genoeg? Toemaar, dit is normaal.
 - b Laai u bokke af en sit hulle in die skou hokke in groepe soos wat hulle by die huis was - hulle ken mekaar.
 - c Moet nooit te veel bokke in een hok sit nie, hulle moet vir 2 - 4 dae in daardie hokkies bly.
 - d Gee presies dieselfde voer as by die huis.
 - e Smeer al die bokke se horings en rooi areas olie om glans te gee. (Gewone motorolie)
- 8 Beoordeling begin.
- a Maak seker u neem die regte bok vir die regte gewigsgroep of ouderdom.
 - b Wanneer u of u hanteerder die bok in die ring los, wys hom vir die beoordelaar en wees trots op hom. Dit is immers die beste wat u het. Moet nooit die bok sleep nie, dit kan sy kootgewrigte pap maak.
 - c U het nou die punt bereik wat u niks meer kan doen nie. Neem u prys en "skoert" uit die ring uit! (Grappie)

Skou is verby. Ek hoop u het iets uit die beoordeling geleer. As u nie geleer het nie, vergeet die skou vinnig en gaan na die volgende skou.

As u bokke goeie en korrekte bouvorm, groei vermoë, grootte en goeie bene het, kan u hulle komplimenteer met goeie kondisie en sal hulle pryse kry. As dit nie die geval is nie, kan u hulle voer tot volgende jaar en u sal nie sommer 'n prys wen nie. (Feeding is half the breeding, but never forget the breeding!)

the neck (mane); hair at the forelegs, crown at the base of the abdomen and hair at the hind legs (these places are trimmed very slightly). You can also trim the tail hair. Note that goats are also combed to remove all the down hair.

- 4. Trim or scuff of horns. You must focus on the fact that sharp ridges on horns can be grated or scuffed away, and remember that horns as a whole can be scuffed smooth.
- 5. Show team planning is paramount. You have already selected the best group of goats to feed for the show.

Now, you weigh the goats and pick out the best in each weight or tooth class, e.g. 4T or 6T or as they do abroad; focus on each age group.

- 6. Washing of goats is a vital step. The day before the show is when you must wash the goats you want to show. Use ordinary dish washing soap so that your goats will be beautifully white and clean and ready for the show. It is a good idea to give each goat you want to show the recommended dose of antibiotics before you wash and transport them to the show. Believe me, it prevents a lot of tears and losses, as it prevents pneumonia and Pasteurella, and seriously reduces stress.
- 7. Plan for when you arrive at the show. Your nerves will be up. Are my goats good enough, fat enough, beautiful enough and big enough? This is completely normal. Offload your goats and put them in the show pens in groups as they were at home - they know each other. Never put too many goats in one pen, they must stay in those pens for 2-4 days so must be comfortable. Give them exactly the same feed as you did at home, and lubricate all the goats' horns and red areas with oil to give them a shine, using ordinary motor oil).
- 8. When judging begins, make sure you take the right goat for the right weight or age group. When you or your handler free the goat in the show ring, show it to the judges and be proud of your goat. After all, it's the best you have. Never drag the goat, it can make his wrist joints mushy. You have now reached the point where you can do nothing more. Take your prize and get out of the ring! The show is over quickly, so make sure you have learned something from the judging. If you have not learned, quickly forget the show and go to the next.

If your goats have good and correct build, growth ability, size and good legs, you can improve them with good condition, and they will get prizes. If not, you can feed them until next year and you will still not win a prize. Always remember, feeding is half the breeding, but never forget the breeding!

Good luck!
